CAREER OBJECTIVE

Computer Science student (GPA 3.94/4.0) specializing in applied machine learning and full-stack development, with experience building production-facing reporting systems and predictive models that translate into measurable business impact. Seeking a software development or data role where I can apply strong analytical and engineering skills to real-world problems.

EDUCATION

University of Wollongong in Dubai *Expected Apr 2027*

Bachelor of Computer Science | GPA: 3.94/4.0

Relevant Coursework: Algorithms and Data Structures, Database Systems, Modern Artificial Intelligence, System Security, Object-Oriented Design and Programming, Networks and Communications

The Westminster School, Dubai, GEMS Education *Sep 2022 – Jul 2024*

A Levels: Information Technology, Physics, Chemistry, Biology

WORK EXPERIENCE

Al Islami Foods — IT Intern, Software & Reporting Systems *Jul 2026 – Sep 2026*

Dubai, UAE

- Mapped and assessed the company's IT infrastructure to inform infrastructure and modernization planning.
- Developed and presented an IT modernization roadmap to leadership, proposing AI-driven initiatives
- Developed and automated backend reporting workflows using JavaScript, integrating CRM and Members data to generate and distribute recurring Finance/HR and Warehouse reports; implemented timezone-aware scheduling and cursor-based pagination for reliable data retrieval.
- Diagnosed cross-layer application and data issues across frontend, backend, and CRM systems using Chrome network logs and protocol-level diagnostics.
- Analyzed sales, SKU, and competitor datasets using Excel PivotTables, VLOOKUP/LOOKUP, and statistical functions to identify product trends and competitive positioning.

LEADERSHIP & VOLUNTARY EXPERIENCE

MedicPals — Co-Founder & President, Medical Society *Jun 2022 – Aug 2024*

- Founded and led a 40+ member medical society, organizing workshops and mentoring sessions and growing a mental health awareness Instagram campaign to 1,000+ followers.

AWARDS

GuardianHER — 1st Place, InnovateHER Hackathon Challenge

Jun 2026

HTML, CSS, JavaScript, TypeScript

- Led ideation and design of a women's safety platform under a 48-hour deadline, rapidly prototyping the concept into a working demo.
- Presented the solution and addressed judges' questions, securing 1st place among competing teams.

Academic Excellence Award — The Westminster School, Dubai

Jun 2022

- Awarded for outstanding IGCSE performance: 7 A*s and 1 A.

PROJECTS

Student Dropout Prediction Model

Apr 2026 – Jun 2026

Python, Scikit-learn | github.com/HuzSaddle/CSCI323_Student_Dropout_Prediction

- Co-developed and evaluated four ML classification models to predict student dropout risk, achieving 0.819 ROC-AUC and 75.6% recall.
- Quantified business impact for a real institution (est. AED 5.84M in annually preserved tuition revenue) and translated findings into advisor-led intervention recommendations.

World Happiness Report — Exploratory Data Analysis

May 2026

Pandas, SQLite, Matplotlib, Seaborn, Excel | github.com/salehacodes/world-happiness-analysis

- Cleaned, merged, and standardized 5 years of data; queried with SQLite to surface country rankings and trends (2015–2019).
- Built correlation heatmaps and pair plots identifying GDP as the strongest predictor ($r = 0.79$)
- Developed an interactive Excel dashboard with pivot tables, slicers, and a correlation matrix.

SKILLS

Programming: Python, HTML, CSS, JavaScript, TypeScript

Data Analytics & Machine Learning: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Excel

Databases: MySQL, SQLite, Oracle PL/SQL

Tools & Platforms: Wix Velo, Qlik, Microsoft 365, Git/GitHub, Jupyter Notebook

Languages: English (IELTS 8.5, C2), Urdu, Hindi
